To the best of my knowldge HSCA did not get the FBI/ERDA FOIAAs that I got, I have no reason to believe that Cabell had any influence on the motorcade route and accordong to a Secret Service investigation he did not.

What you say about the Curry plan to move LHO during the night, and I think that years ago I may have heard such a report, is interesting but it requires some backstopping to be believed today and without a tape you do not have that.

I don't think there was any Cabell/Ruby connection.

Chaney is dead. If Ellis is alive would he write it out for you.

Yes, I would like tapes of those interviews but between my age, my health and the work I'm on I'll not have time to listen to them now. If you have summaries of them that I could read rapidly and would ap reciate.

Thanks,

HW
